

Manipulation of categorical and mixed data edits and error localization with the **editrules** package

package version 1.0.2

Mark van der Loo and Edwin de Jonge

August 10, 2011

Abstract

This vignette is far from finished. Version 2.0 fo the package will have the full vignette. At the moment, functionality for treating categorical data has alpha status and is not public yet. Refer to the accompanying paper De Jonge and Van der Loo (2011) for manipulation of linear edits.
